LED Milky Mini Globe Light Bulb G45 4W 470Lm E27 2700K - M01

Description

Smaller in size, bigger in character: the G45 LED Milky Mini Globe light bulb radiates a warm, intense lighting in any room. On top of that, the opalescent glass makes for a welcoming atmosphere anywhere.

What are the characteristics of this light bulb?

The G45 M01 LED Milky Mini Globe light bulb was designed to guarantee good colour rendition and even light distribution. Thanks to the 4W consumption which ensures a 470Lm brightness, you'll have gorgeous illumination in any context, both domestic and commercial. The E27 fitting also makes it compatible with most standard lamp holders.

What kind of lighting does this bulb emit?

The 2700K light colour radiating from the M01 light bulb guarantees a welcoming and soothing atmosphere in any room. Whether it's a living room, bedroom or commercial space, this light bulb is the missing piece to your everyday life.

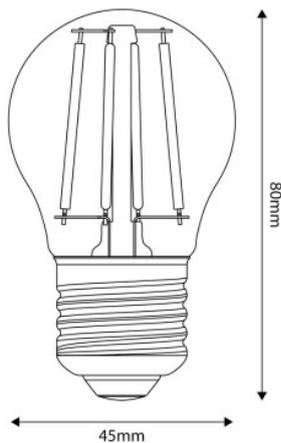

The light bulbs with **white satin glass** offer an even light distribution and help reduce glare whilst also creating an aesthetically pleasing composition that reduces eye strain. For a soothing, comfortable illumination,

Which technology does this light bulb use?

The G45 M01 LED Milky Mini Globe light bulb is designed to reduce energy consumption through its LED filament technology. Compared to traditional incandescent bulbs, LED products can provide up to 90% energy savings. Enjoy high-quality illumination without the burden of hefty electricity bills.
