Spostaluce Kit with E27 lamp holder

Finish: Black

Description

The E27 Spostaluce Kit is the ideal solution for lighting design enthusiasts who wish to create their own installation to suit any environment, with or without pre existing light sources.

Product characteristics

The E27 Spostaluce kit is compatible with most E27 light bulbs and all 2x0.75 cables, making it a highly versatile product and ensuring adaptability in any room and with any style. Available in black or white options, and can be freely connected to any power outlet.

What kind of lamp can I design with this Spostaluce kit?

Move the light exactly where you want it thanks to this versatile kit. The process is extremely simple: just install your kit on the wall or ceiling and pair it with the plug, E27 light bulb and fabric cables that best suit your style. This product's flexibility will help you create a wide variety of fully customized combinations ranging from minimalist to bold lighting installations, single or multiple falls and so much more.
